The Descending Moon at the Foot of the Mountain

달이 내린 산기슭

Jang-Won Son

#027

It's a scientific education event, and I'm worried that he'll say something about the mountain guardian spirit to the children

Even Doctor Choi is crazy...!

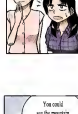
I'm just repeating what I've heard.

It's true about Won Gyung and I can't deny that it happens to him, so I'm just stating it.

You, as a scientist, you shouldn't say that, right?

I'm not talking about science though.

No - whether it's scientific or not, it's nonsense.



You could see the monsters gnawing apart...

Where you go into the hotel lobby, can you see the lizards on the walls and the floor?
Yes. Of course the zombies won't bite lizards outside of it...

Aren't people who seen things like that already weird in the first place?
No! That is...

That's not same at all!

I'm talking about how weird it is.

...You're not making any sense!

A talk like that...

He said it.

Goo Il was wrong.

Goo Il is friends with Doctor Oh, so he was trying to be on your side...

No, he wants to tease Yeon Hee.

Hmm

I am, too.

When I go to... the mountain like that, maybe...

Sometimes things go really well, or things get all twisted up out of the blue.

Ah, I should be nice to this mountain... or be thankful, something like that...

If there are mountain guardian spirits, I want to see them someday...

Other than mountain guardian spirits, maybe something more real.

Don't you want to see the spirit of the stratum?

Yes? Ah... maybe.

Please have some.
Wow, thank you. What is it?

They're selling triobite bread over there.

Hm, it's yummy!

Hm...

"The stratum" is an artificial term, so I don't think something like that exists.

So that the stratum can be explained easily.

Originally, were the mesolithic started by humans and did the stratum exist on its own?

Hm... but when you say the spirit of woman, it sounds like... it's an academic term.

Maybe when they appear as humans, they look like you, doctor.
Sfx: Sparw
Sfx: Ugh

Oh my, Wall, are you okay?

Yes...

Hey!

Now there are 12 kindergarten students. I don't think I can do it alone.
Ah, okay.

Please do it with me.
Yeah, we'll be on our way.
Good work.

There are two teachers as well, as there are fourteen people, the full course should be.

No, if somebody comes I have to work.

Don't let anybody come.
You're lazy.
Hehe

They're too young to cross the streams, so let's take out the cephalopod fossil viewing...

Let's take out the hydrothermal experiment as well. But we have to decide the location first.

Ah, have some trilobite bread.
Yes?

Trilobite bread...
Thank you.

The doctor brought it

STs. Munch munch
